Time	Activity
	<p>Building System Leadership for Integrated Care Aims of the May Clinical Senate Forum</p> <p>Whilst the move towards Integrated Care Systems is acknowledged and understood by most senior leaders in London's Trusts, Clinical Commissioning Groups and Local Authorities, it is often less well understood by staff working with patients, by carers and by citizens. This meeting will explore what this new landscape, including the shared responsibilities for population health, means in practice.</p> <p>The aims of this Senate Forum are to:</p> <ul style="list-style-type: none"> • Create a shared understanding of what the change from organisational leadership to integrated system leadership, including the responsibility for population health, will mean in practice and the competencies it requires. • Identify the both the enablers and barriers to developing system leadership skills at different levels and across teams. • Agree the steps required to support leadership development and facilitate the delivery of integrated care systems that will benefit patients, carers and our fellow Londoners
